VALUATION METRICS

Value Potential per Hectare (ICE Base)

~€ 27,692/ha

Physical Collateral – Final Target (100k ha)

~€ 2.77 Billion

Carbon Price Projection 2050 (IEA/Bloomberg)

US\$ 238/t

PROTECTING THE AMAZON REQUIRES WORLD-CLASS INFRASTRUCTURE AND SCIENCE

Research Center & Laboratories

- Advanced monitoring of native wildlife and ecosystems
- Sustainable biotechnology research facilities
- Partnerships with leading international universities
- Full focus on Amazon biodiversity and fauna studies

SCIENCE APPLIED TO CONSERVATION

Immersive Eco-Lodge

- Hands-on experience in daily rainforest life
- Rustic accommodation – full immersion, no luxury
- Practical environmental education for token holders
- Exclusive access reserved for DBB token holders

DIRECT CONNECTION TO PHYSICAL COLLATERAL

THE 1:1 COLLATERAL RULE IS THE FOUNDATION OF DIBBLECOIN'S TRUST

Dibblecoin's non-negotiable commitment: no token is ever issued without its equivalent physical land asset, ensuring full 24/7 transparency for all holders.

01

LAND ACQUISITION

Full legal guarantee that the area will never be exploited, logged, or deforested.

02

TIER 1 AUDIT

Physical and documentary verification conducted by leading international audit firms.

03

ON-CHAIN REGISTRATION

Cryptographic hashes published on-chain for fully public and immutable auditability.

04

PERPETUAL PROTECTION

Notarized registration with permanent and irrevocable environmental designation.

IMMUTABLE AUDITABILITY • FULL TRANSPARENCY 24/7

ORGANIC TOKEN SUPPLY PROTECTS INVESTORS FROM ARBITRARY INFLATION

INITIAL SUPPLY ALLOCATION

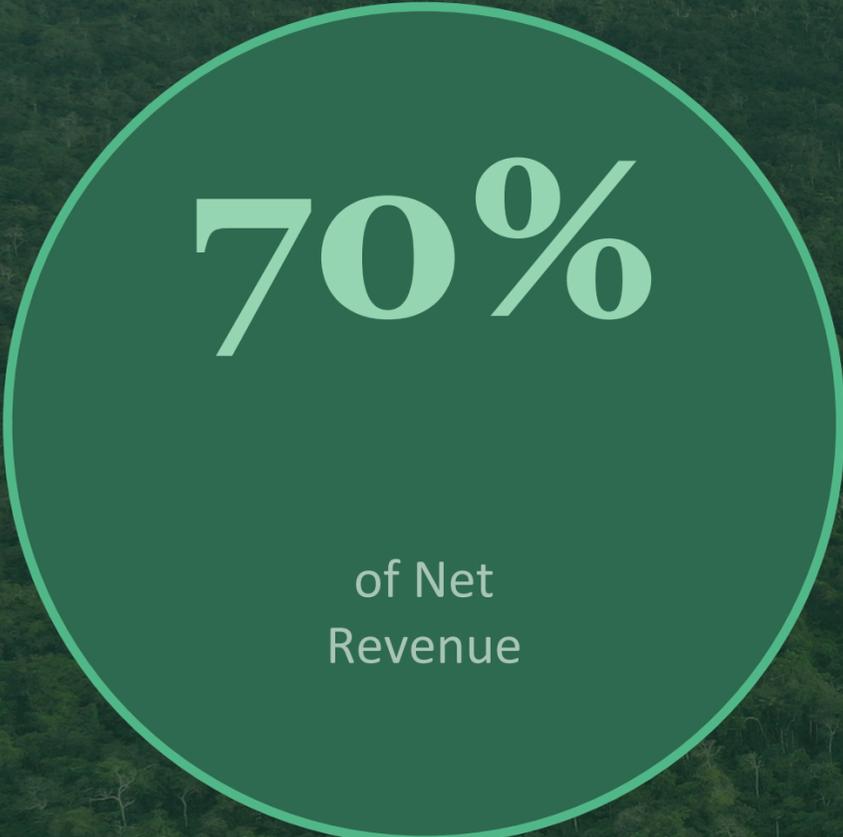

Backed by 3,000 ha of physical land collateral

STABILITY RULES

- 20%** **Permanent Liquidity Reserve**
Mandatory reserve maintained to ensure ecosystem financial health.
- 50/50** **Pre-Sale / Strategic OTC**
Balanced distribution between community members and institutional investors.
- 100k** **Expansion Cap**
Supply only grows upon verified acquisition and audit of new native forest land.

GUARDIAN NODES: THE REWARD ENGINE OF THE DIBBLECOIN ECOSYSTEM

The Guardian Node ecosystem aligns holder interests with long-term conservation, transforming environmental commitment into tangible financial returns.

distributed to Guardian Nodes

STAKING REQUIREMENT

To be eligible for dividend distributions, DBB tokens must be actively staked in Guardian Nodes.

REVENUE SOURCE

Dividends are derived exclusively from the real-world leasing of carbon credits generated by the preserved native forest areas.

DISTRIBUTION MODEL

Payouts are proportional to the number of tokens staked and the duration of participation in the ecosystem.

A GO-TO-MARKET STRATEGY BUILT ON FUNDAMENTALS AND SECURITY

Dibblecoin adopts a fully institutional approach, prioritizing the stability of physical collateral over speculative volatility. DEX listings are deliberately avoided to prevent market manipulation.

01 PRE-SALE

Funding the initial expansion from 3,000 to 23,000 hectares of verified native forest.

3k → 23k ha

02 OTC MARKET

Targeting ESG Funds, Net-Zero Corporations, and Family Offices seeking compliant green assets.

Institutional Investors

03 CEX LISTING

Exchange listing only after full collateral maturity and all certifications are completed.

100,000 ha – Final Target

DIBBLECOIN'S LEGACY IS THE IRREVOCABLE PROTECTION OF NATURE

By investing in Dibblecoin, you become part of an irrevocable protection mechanism. Financial return is the natural consequence of holding a real, scarce, and planet-critical asset.

THE LEGACY SPEAKS FOR ITSELF.
